Pistol-Training.com FAST Drill target, 1/3 scale	27

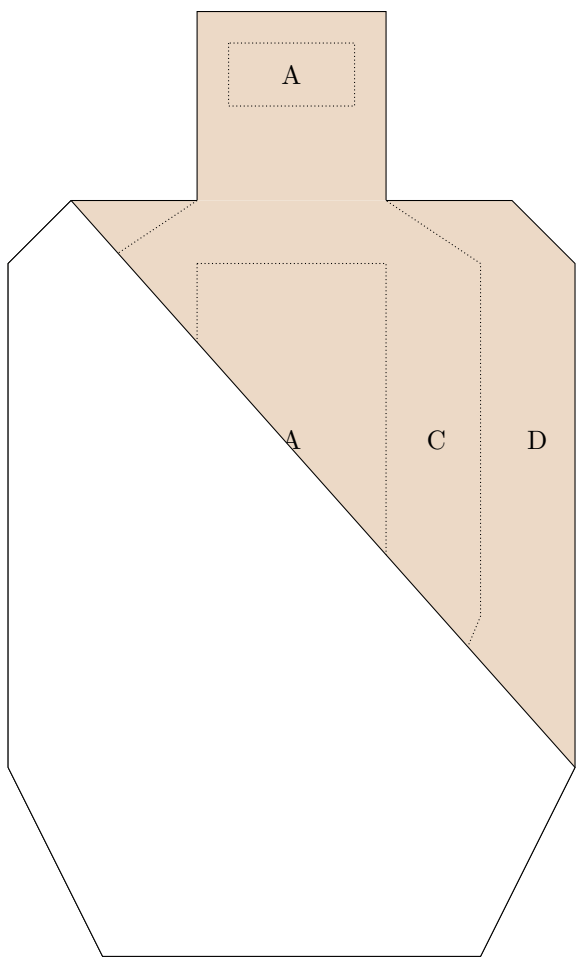

These are common practical shooting targets scaled for Letter sized (8.5" x 11") paper. Each page has a scale bar along with the target(s) to ensure the target size is accurate. 1/6 scaled targets also have a scaled ruler in yards along the right edge of the page to help judge target spacing for standards or classifiers.

1/3 scale targets can be used with 1 foot = 1 yard. A 7ft distance between the shooter and target will simulate the full sized target at 7 yards. To double the simulated distance use a 1/6 scale target.
